

# PROFESSIONAL DIGITAL BLOOD PRESSURE MONITORS

## HEM-907XL IntelliSense® Digital Blood Pressure Monitor

**ACCURATE** – IntelliSense® digital logic provides automatic cuff inflation and auto-calibration

- Validated technology
- Measurements within +/- 3 mmHg or 2%
- Average mode averages up to three measurements

**DURABLE** – Designed for the physical demands of your busy practice.

- Cycle tested at 100,000 measurements – provides years of reliable use
- Sturdy construction provides resistance to damage not found in consumer models
- 5 year limited warranty (1 year on cuff)

**CONVENIENT** – Oscillometric technology lets you tend to patients where and how you prefer

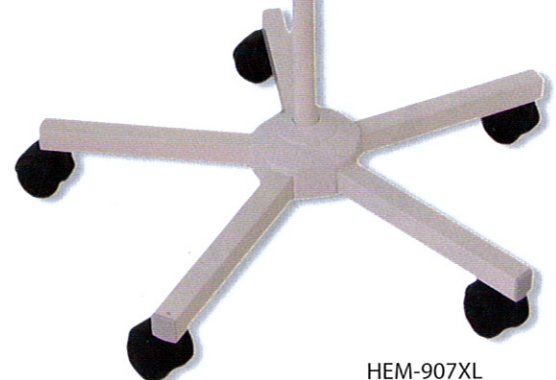

- Because the HEM-907XL is digital, it does not rely on personal interpretation
- Automatic cuff inflation and deflation eliminates the need to predetermine inflation level setting
- One-button operation means your staff is free to perform other tasks during 1-3 measurement(s)
- Can adjust measurement intervals between readings (5 seconds, 30 seconds, 1 minute, 2 minutes)
- Internal battery provides portability for triage or inter-exam room use
- Wheeled stand with basket or wall mount available
- Mercury Free!
- Complies with ROHS regulations

**CLINICAL FLEXIBILITY** – The functions your patients need

- HIDE functions - fights white coat syndrome
- Four cuff sizes, including extra-large, allows measurements on arm circumferences of 7" to 20"

Options:  
HEM-907-Stand  
HEM-907-WKIT (Wall mount)  
HEM-907-PKIT (Pole mount)
